

Issue – Unable to reset Admin Login Password

Website : Tjells.com

Content : OJS (Open Journal System) an Open Source project related to maintaining Journals

Credentials

Hostinger.in

UN : gilbert@impel.live

PW : GOD bless1##

Please look for website Tjells.com

From its Dashboard you have access to the Database and the files through Filemanager

I did a MD5 Reset through PhpMyAdmin and it is not working

Security Setting details from the config file (For you to have an idea)

```
;;;;;;;;;;;;;;  
; Security Settings ;  
;;;;;;;;;;;;;;  
  
[security]  
  
; Force SSL connections site-wide  
force_ssl = Off  
  
; Force SSL connections for login only  
force_login_ssl = Off  
  
; This check will invalidate a session if the user's IP address changes.  
; Enabling this option provides some amount of additional security, but may  
; cause problems for users behind a proxy farm (e.g., AOL).  
session_check_ip = Off  
  
; The encryption (hashing) algorithm to use for encrypting user passwords  
; Valid values are: md5, sha1  
; NOTE: This hashing method is deprecated, but necessary to permit gradual  
; migration of old password hashes.  
encryption = sha1  
  
; The unique salt to use for generating password reset hashes  
salt = "YouMustSetASecretKeyHere!!"  
  
; The unique secret used for encoding and decoding API keys  
api_key_secret = ""  
  
; The number of seconds before a password reset hash expires (defaults to 7200 / 2 hours)  
reset_seconds = 7200
```

Please do not disturb the other sites this is a common login
